

MUTHU GANESH

Computer Engineering Student | Cybersecurity Specialization

Tamil Nadu, India • +91 9677859378 • muthuganeshsenthil@gmail.com • [LinkedIn](#) • [GitHub](#)

EXECUTIVE SUMMARY

Motivated Computer Engineering student specializing in Cybersecurity with foundational knowledge in AWS, networking, SIEM concepts, and threat detection. Proficient in Python, SQL, Linux, and cybersecurity tools, with hands-on project experience in secure application development, network analysis, and post-quantum cryptography. Passionate about cloud security research, AI-driven cybersecurity solutions, and building secure, scalable systems. Eager to contribute technical skills in a Cloud Security Research Internship.

TECHNICAL SKILLS

Programming Languages: Python, SQL, Bash (Basics)

Cybersecurity: Networking Fundamentals, Threat Detection, SIEM Concepts, Post-Quantum Cryptography

Cloud: AWS Basics — EC2, S3

Tools & Software: Wireshark, Git, Linux (Kali)

Databases: SQLite, MySQL

SOFT SKILLS

Communication & Teamwork • Problem Solving • Analytical Thinking • Time Management • Adaptability • Continuous Learning

PROFESSIONAL EXPERIENCE

Karunya Institute of Technology and Sciences

Ongoing

Project Contributor | Academic Cybersecurity & Software Projects

Responsibilities

- Developed a desktop Budget Tracker application using Python, Tkinter, and SQLite with secure authentication and session management
- Designed normalized database structures for efficient persistent data storage and retrieval
- Built a COVID-19 analytics dashboard using Python and SQL; performed data cleaning, analysis, and visualization on large datasets
- Captured and analyzed live network traffic using Wireshark; investigated protocols and simulated SOC threat-detection workflows
- Researched post-quantum cryptography for secure storage concepts, studying quantum-resistant encryption and key management techniques
- Applied cybersecurity, database, and software engineering principles consistently across multiple academic projects

Impact

- Delivered 4 end-to-end projects spanning secure software development, data analytics, network analysis, and cryptography research
- Strengthened practical skills in SIEM workflows, network monitoring, and secure software development through real implementation
- Built modular, maintainable codebases applying persistent storage patterns and clean architecture principles

EDUCATION

B.Tech in Computer Engineering — Cybersecurity Specialization

Expected: May 2027

Karunya Institute of Technology and Sciences, Tamil Nadu, India

Relevant Coursework: Computer Networks • Cybersecurity Fundamentals • Data Structures & Algorithms • Operating Systems

AWARDS & ACCOMPLISHMENTS

- AWS Cloud Practitioner Certification — In Progress (actively building foundational cloud security expertise)
- Self-directed learning completed in Cybersecurity Fundamentals, Threat Detection, SIEM Concepts, and SOC Workflows

- Successfully delivered 4 academic projects across secure software development, network analysis, and post-quantum cryptography
- Actively expanding skills in AWS security services, IAM policies, cloud threat detection, security automation, and AI-driven cybersecurity
